FSR

LOOKBOOK 2022

EMPOWERING
CONNECTIONS

FSR is a leading designer and manufacturer of power, data and audio/video solutions for the contract office furniture industry. In today's interconnected world, the workspace extends beyond the physical building, offices and boardrooms. FSR's product line of collaborative solutions are designed to address the way we work and approach business in the 21st century.

Modular Linx System

Transform how you power your workstations with the Modular Linx System. This relocatable and reusable power system can be maximized to distribute power to up to 20 workstations.

Smart-Way Raceway System

Empower your connections from the floor to the table with the Smart-Way Raceway. The Smart-Way provides you an In- or On-floor raceway option that combines unparalleled functionality with breathtaking materials. We didn't just stop at the floor with our raceway; the newest addition to the Smart-Way family allows us to transition from the Smart-Way floor raceway to the ceiling.
Effortlessly manage your cables with the Block adjustable wire duct. The Block provides a flexible, simple, and stylish way to route cabling from the underside of the work surface to the floor. The sleek design will integrate with any aesthetic.

Symphony Collection

The Symphony table boxes are configurable to your needs, providing functional flexibility for your work and meeting spaces. The Symphony Collection is available in Clamp-On, Under-Table, and In-Table options and can even come with a POP of color to add life to your workspace.

The Pedestal is an attractive addition to your space. The Symphony Pedestal incorporates seamless power and charging in waiting areas and at your workspaces. This floor-standing unit provides an inviting place to plug in and is agile enough to accommodate charging multiple devices.

Table Boxes

Our CT6 and Unity table boxes offer contemporary designs fused with internal charging, power, and data capabilities. These table box collections allow for various configurations ideal for today's meeting rooms and collaborative environments.
